

The Covid Supplemental Appropriations Act, 2022 provides \$15.6 billion to continue managing the coronavirus pandemic in the United States and around the world.

STRENGTHENS DOMESTIC PREPAREDNESS

- Secures \$10.6 billion for the Public Health and Social Services Emergency Fund, ensuring the Department of Health and Human Services can fully address current pandemic realities and prepare for future variants:
 - \$9.85 billion for the Biomedical Advanced Research and Development Authority (BARDA) for procurement of oral antivirals, monoclonal antibodies, pre-exposure prophylaxis, and vaccines
 - \$750 million in funding to develop medical countermeasures for future variants, including for research and development of a vaccine that can target any new variant

EXPANDS GLOBAL RESPONSE

- Provides \$4.45 billion for global health initiatives, including funding for the Initiative for Global Vaccine Access (Global VAX)
- Saves lives by providing funding for supplies and medical countermeasures to fight COVID abroad, including assistance for therapeutics, testing capabilities, and mitigation measures and operational support for health care systems and workers

DELIVERS HUMANITARIAN ASSISTANCE

- Delivers lifesaving humanitarian assistance to vulnerable populations worldwide, including with \$425 million for International Disaster Assistance to provide food, clean water, health care and protection services to vulnerable communities around the world
- Prevents and responds to COVID outbreaks among displaced populations with \$75 million for Migration and Refugee Assistance
